Letlhogile Secondary School · Completed 2022

Projects

Advocate Now

Django, Python, Database Integration · Group Project — Project Leader

- Designed a smart booking system with real-time scheduling and slot-locking to prevent conflicts
- Implemented client-lawyer matching by location, language, and case type
- Automated notifications to reduce staff workload
- Integrated secure digital storage for sensitive client data

Django Python SQL

Student Dental Care

Django, Python · Solo Project

- Built a student appointment booking system for oral and dental issues
- Built a responsive interface and backend logic for scheduling and managing appointments
- Applied Django's authentication and database features for secure data handling

Django Python Auth

Portfolio Website

HTML & CSS · Solo Project

- Designed and built a personal portfolio site using semantic HTML and hand-written CSS
- Implemented a responsive two-column layout with a downloadable PDF version

HTML5 CSS3

Work Experience

Software Developer Learnership
Dynamic DNA · In Progress, 2026

Gaining hands-on software development experience as part of a structured learnership program.

Academic Projects
Sol Plaatje University

Developed academic application development projects using Python, HTML, CSS, and JavaScript. Worked on Django-based web application projects involving user authentication and database integration, including building responsive UI pages and backend functionality for academic systems.
